

Connect with us to discover how AI can transform your business.

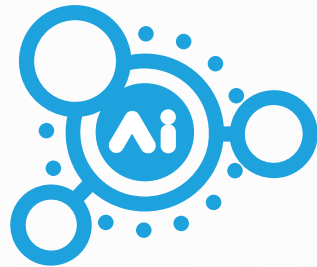

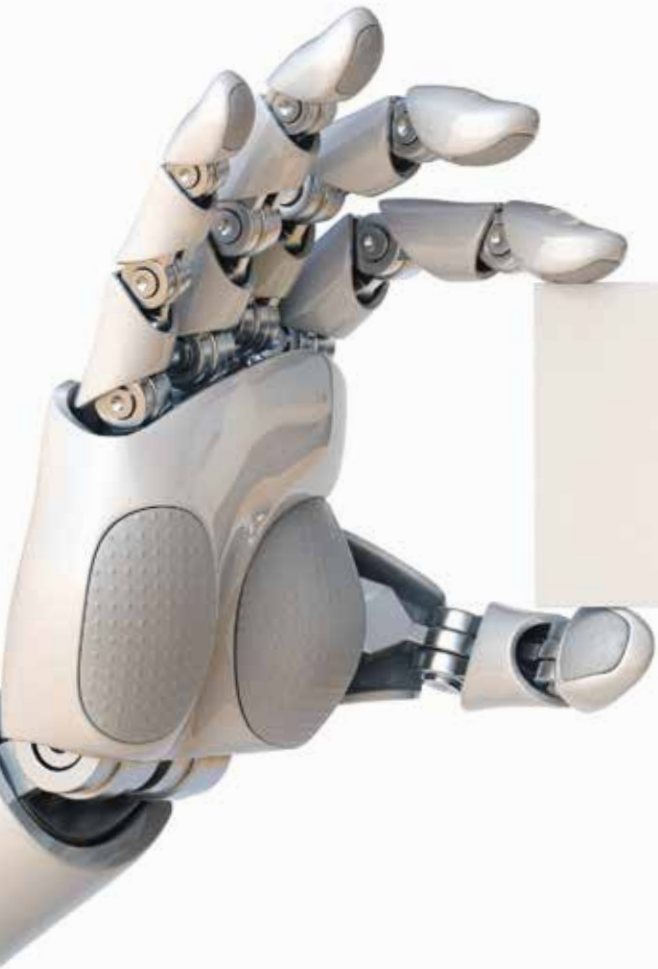

**Service offering:
AI Academy**

**Our education
program aims to let AI
supercharge your
enterprise capabilities.**

AI affects the work of everyone in your organisation at different levels and in different ways. But it can only improve it if, in addition to being open, colleagues have up-to-date knowledge of how to apply AI effectively, appropriate to their job role.

For this we offer a training scheme tailored to three different target groups - and in each case to the business needs of the company.

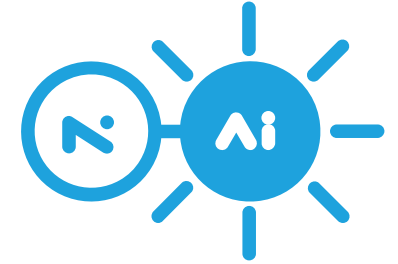

Explore

Join our short introductory course (half day or one day) to learn the basics of AI, including how it works and how it transforms the way we live and work.

Apply

This 3-day course gives you insight into how AI is or could be deployed in your organization and your role in making the most of it.

Create

Our 10-21-day bootcamp-style courses take you on a deep dive into how to build, run and improve AI and ML solutions to tackle specific business needs.

Our comprehensive training program covers three integral aspects of AI adoption and implementation to fully support your organisation's AI journey.

Executive AI Insight Sessions: Specialised courses for top management to grasp AI's strategic implications and leverage it for competitive advantage.

Generative AI and LLM Focus: Across all levels—Explore, Apply, Create—we emphasise the potential and application of Generative AI and Large Language Models. While integrated into all levels of our general AI courses, we also offer dedicated training on Generative AI and Large Language Models at each level, catering to specialised interests and applications.

Function-Specific Courses: Tailored training for departments like Marketing, HR, and more, focusing on practical AI applications in specific corporate functions.

All courses are:

- Developed and delivered by seasoned AI experts.
- Updated regularly to align with the latest AI developments.
- Flexible and customizable to participants' needs.
- Available on site or online with remote access.
- Hands-on at all levels, from explorers to creators.

Use cases

Discover how customer testimonials showcase the success of our AI training courses, inspiring professionals to excel in the field:

Finding a remedy to pill production inefficiencies brought teams of [Gedeon Richter Pharmaceutical Company](#) up to speed on AI development and helped them translate their new-found knowledge into performance and quality gains with deep learning.

Application-level training course to [Magyar Telekom](#) introduced a leadership team to the science and real-life applications of AI with a special focus on how it could supercharge the telecommunications industry.

Building AI success in business, mastered delivering a biannual master's program in data science based on a syllabus specifically designed for students of the [International Business School of Budapest](#).
